TABLE OF CONTENTS

Volume 82

ARTICLES

YUMAO, XU, ZHOU CHAOFU, LI ZHONGKAI and ZHANG WEI / Turbulent Structure and Local Similarity in the Tower Layer over the Nanjing Area 1–21

DELAGE, YVES / Parameterising Sub-Grid Scale Vertical Transport in Atmospheric Models Under Statically Stable Conditions 23–48

KATUL, GABRIEL, CHENG-I HSIEH and JOHN SIGMON / Energy-Inertial Scale interactions for Velocity and Temperature in the Unstable Atmospheric Surface Layer 49–80

RÉCHOU, ANNE and PIERRE DURAND / Conditional Sampling and Scale Analysis of the Marine Atmospheric Mixed Layer – Sofia Experiment 81–104

MARTANO, P. and A. ROMANELLI / A Routine for the Calculation of the Time-Dependent Height of the Atmospheric Boundary Layer from Surface-Layer Parameters 105–117

VAN DEN HURK, B.J.J.M. and A.A.M. HOLTSLAG / On the Bulk Parameterization of Surface Fluxes for Various Conditions and Parameter Ranges 119–134

SILVA DIAS, MARIA A.F. and ANTONIO JASCHKE MACHADO / The Role of Local Circulations in Summertime Convective Development and Nocturnal Fog in São Paulo, Brazil 135–157

Research Notes

DE BRUIN, H.A.R. and A. VERHOEF / A New Method to Determine the Zero-Plane Displacement 159–164

CHIBA, OSAMU / Variability of the Sea-Breeze Front From Sodar Measurements 165–174

LHOMME, J.-P. / A Theoretical Basis for the Priestley-Taylor Coefficient 179–191

ANFOSSI, DOMENICO, ENRICO FERRERO, DAVIDE SACCHETTI and SILVIA TRINI CASTELLI / Comparison Among Empirical Probability Density Functions of the Vertical Velocity in the Surface Layer Based on Higher Order Correlations 193–218

HORST, T.W. / A Simple Formula for Attenuation of Eddy Fluxes Measured with First-Order-Response Scalar Sensors 219–233

RUSSELL, ROBERT W. and JAMES W. WILSON / Radar-Observed "Fine Lines" in the Optically Clear Boundary Layer: Reflectivity Contributions from Aerial Plankton and Its Predators 235–262

PHILIP, J.R. / Blending Heights for Winds Oblique to Checkerboards 263–281

Boundary-Layer Meteorology **83:** 175–176, 1997.

MIHAILOVIĆ, DRAGUTIN T. and GEORGE KALLOS / A Sensitivity Study of a Coupled Soil-Vegetation Boundary-Layer Scheme for Use in Atmospheric Modeling 283–315
DU, SHUMING / The Effects of Higher Eulerian Velocity Moments on the Mean Concentration Distribution 317–340
YEE, EUGENE and R. CHAN / Comments on "Relationships between Higher Moments of Concentration and of Dose in Turbulent Dispersion" 341–351
RIEDER, KARL F. / Analysis of Sea-Surface Drag Parameterizations in Open Ocean Conditions 355–377
MAURIZI, A., S. DI SABATINO, F. TROMBETTI and F. TAMPIERI / A Method of Analysis for Turbulent Flows Using the Streamline Coordinate System 379–397
DÖRNBRACK, ANDREAS and CARMEN J. NAPPO / A Note on the Application of Linear Wave Theory at a Critical Level 399–416
WANG, HAO and E.S. TAKLE / Momentum Budget and Shelter Mechanism of Boundary-Layer Flow Near a Shelterbelt 417–435
SCHLÜSSEL, PETER, ALEXANDER V. SOLOVIEV and WILLIAM J. EMERY / Cool and Freshwater Skin of the Ocean During Rainfall 437–472
ALAPATY, KIRAN, SETHU RAMAN and DEVDUTTA S. NIYOGI /Uncertainty in the Specification of Surface Characteristics: A Study of Prediction Errors in the Boundary Layer 473–500
SORBJAN, ZBIGNIEW / Decay of Convective Turbulence Revisited 501–515
SARMA, Y.V.B., P. SEETARAMAYAA, V.S.N. MURTY and D.P. RAO / Influence of the Monsoon Trough on Air-Sea Interaction in the Head of the Bay of Bengal During the Southwest Monsoon of 1990 (Monsoon Trough Boundary Layer Experiment-90 517–526
Announcement 175
The 'KLUWER' LaTeX Style File 177, 353, 527
